

The USA By Area

```
1  var AreaList = getColumn("US States", "Area");
2  var stateList  = getColumn("US States", "State Name");
3  var BiggestStateAreaList = [];
4
5
6
7  //This function recieves the minimum area and generate the list of states larger than minimum area
8  function StatesByArea(minimum) {
9      var Area;
10     for (var i = 0; i < AreaList.length; i++) {
11         Area = AreaList[i];
12         if (Area > minimum) {
13             appendItem(BiggestStateAreaList, stateList[i]);
14         }
15     }
16     setText("answersKey", BiggestStateAreaList.join("\n"));
17     if (getText("DropdownArea") == "Select the minimum area") {
18         setText("answersKey", "Make sure you choose an area from the dropdown menu");
19     }
20 }
21 //This function calls the OnEvent twice and complete the request.
22 onEvent("DropdownArea", "click", function( ) {
23     StatesByArea(getNumber("DropdownArea"));
24 });
25
26 }
